

Karaoke Videos

In MP4 video format, the lyrics are presented in real time as the song track plays, with each line highlighted when it needs to be sung.

There are two videos for each song:

- the first with audible demonstration vocals on the track, so your singers can familiarise themselves with how the song should be delivered, whilst reading the visual lyric cues...
- the second without vocals on the track (but still with visual lyric cues), so your singers can practise their performance once the song has been learned.

The videos will load and play in most standard media players on your computer and are of a high enough resolution so you can display on larger interactive whiteboards.

Available only as a download, the video collection should be added to your basket and paid for at the point of ordering, by credit/debit card or paypal. On completion of your order, you will receive a confirmation email with a link to download the zip file containing the videos. Please note the file size is approx 160mb and download times will vary depending on your internet connection.
